

Shared Hosting Solutions: Starter Package

As one of our most economical hosting packages, this is best for start-up businesses and small static websites under 100 pages.

Starter is also a good choice for sites using Adobe Flash intros, MP3 players, and YouTube.com video players. In a nutshell, this package includes everything most new websites need to get started, including robust email, an award-winning self-service control panel, spam and virus filters, third-party software support, and visual site visitor statistics.

Storage & Bandwidth

Many hosting companies feature as much as "unlimited" disk space and bandwidth. While there is no "average" in terms of the size of most websites, we have found that most sites use far less than 50MB of disk space excluding email. While email can take hundreds of megabytes (MBs) or even gigabytes (GBs), most businesses would rather download all messages using an email client such as Microsoft Office Outlook® or Entourage®.

- Disk Space: 500MB
- Bandwidth: 3GB

Email Features

One of the most important forms of communication online is email. That's why we offer the most common protocols and options available online today. Our hosting accounts are compatible to virtually all email clients including Microsoft Office Outlook® and Entourage®.

- Total of five (5) Email Accounts
- AntiSpam Filters
- POP3 Access
- IMAP4 Access
- Email access via Web Browser (Webmail)
- SMTP Mail Server
- Real-Time Spam Black Lists Filter (RBL)
- Catch-Alls
- Mail Forwarding
- Procmail support

Control Panel Features

- Manage all email accounts
- Visitor Tracking Software
- File Manager
- FTP User Management (Includes one FTP user)
- Folder Password Protection

- CentOS 4.5 Operating System
- ControlCentre powered by cPanel®
- Apache 1.3.x Web Server Software

Included with every shared hosting account:

Every shared account comes with essential tools necessary to manage your domain. Additional information and comparison charts are available online at toneee.com/host.

E-Mail Features

- Access your e-mail via any standard web browser.
- Use your favorite email client to access your mailbox via POP3/SMTP or IMAP4. Popular clients include Microsoft Outlook, Outlook Express, Eudora, Netscape Communicator, etc.
- Procmail support
- Set-up autoresponders for any email account. (e.g. "Thank you for contacting us. We will respond to your request shortly.")
- Leave no message behind! All accounts have the option to catch-all emails regardless of spelling errors within the username. (This feature can be turned off.)
- Create mail forwarders and aliases.
- Anti-spam (SpamAssasin) software available free of charge. Either mark spam or automatically move them to a separate folder for review later.
- Even without using SpamAssasin, our servers automatically check available Spam Blacklists in real-time (known as RBL).
- Most accounts allow Mail Exchanger (MX Entry) modification via your Control Panel for corporate mail server usage.

All hosting packages include access to Webmail via any standard web browser. All packages include mobile access as well.
